#### **REASON FOR ALLOWANCE**

5. The following is an examiner's statement of reasons for allowance:

The cited prior art taken alone or in combination fail to teach, in combination with the other claimed limitations a system having a filter for selectively collecting tags generated by a target system during execution of a software program under analysis in accordance to a programmable filtering criteria, specifically the trace filter is adapted to implement a filter table for storing the filtering criteria, the filter table having a list of tag types and associated collection flags indicating that the respective tag type is collectable when set, as recited in the independent claims 1, 9, 12 and 19.

In the closest prior art O'Brien et al, US 6,311,327 (O'Brien) discloses a software analysis system for capturing tags generated by tag statements in instrumented source code; when a tag statement is executed in the target system a tag is written to a determined location in the address space of the target; the tag contains a tag value that is indicative of the location in the source code of the tag statement generating the tag; a pre-processor can process the tag type field and the tag value. O'Brien does not disclose the trace filter is adapted to implement a filter table for storing the filtering criteria, the filter table having a list of tag types and associated collection

flags indicating that the respective tag type is collectable when set, as recited in the independent claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reason for Allowance".
